STC SWEEPER COLLECTOR

COLLECTS AUTUMN LEAVES AND DEBRIS BRILLIANTLY.

When in sweeping mode, the **STC** is fitted with the brush rotor comprising 4 banks of hard-wearing polypropylene bristles which will lift autumn leaves, grass clippings and litter effortlessly into the hopper. The bristles, which are secured firmly into a pre-drilled strip with a wire staple, are a generous length to give a good 'flick' action ensuring that the material is thrown to the back of the hopper.

As a flail collector, the **STC** is fitted with a large diameter steel drum rotor with 4 rows of closely spaced flails, and 2 rows of draft paddles to create the suction for collecting the grass. The **STC** has a wide opening, therefore long or short grass will be collected efficiently without blocking even in wet conditions.
